ED! TOPICS TERM 3, 2019

July 23 – HAPPY 25TH, ED!

To celebrate this momentous occasion we look at birthday celebrations and how some of today's popular traditions began.

August 27 – DESIGN AN AD

We showcase the talents of WA students who created winning advertisements in our annual Design an Ad competition.

July 30 – COOL CATS

We leap into the fascinating world of felines.

September 3 – INSECTS

ED! discovers the world of six-legged critters. They're all around us, and without them ecosystems would collapse. Why is a spider not an insect?

August 6 – CYBER SCHOOL

We all use it, but what is the internet and how, when and why was it invented?

September 10 – COLOUR UNCOVERED

How do we see different hues and do we all see them the same?

August 13 – VEGANISM

ED! strips away the sensationalism and explores veganism – what being a vegan means, why people choose to be one, and the environmental and dietary impacts.

September 17 – A-MAZE-ing

People usually try to get out of them, but this week we head into the marvellous world of mazes.

August 20 – A NOVEL APPROACH

It's Book Week, and to celebrate ED! uncovers the world of graphic novels and comics, such as this term's Serial Story *Brobot*. Find out about fandom, collectibles and the cinematic worlds that grow from these amazing picture stories.

September 24 – SCREENS AWAY, COME AND PLAY

Does screen time kill creativity? What are the advantages of different types of play, such as connecting with nature?

Tuesdays in **The West Australian**
